PROFILE

Senior Software Engineer with 13+ years of experience building scalable backend systems, public APIs, and cloud-native applications using C#, .NET, JavaScript, and TypeScript.with the help of AI tools such as Cursor and custom AI Agents. I bring background in REST API design, distributed systems, caching services, and microservice architectures. Built and maintained .NET/Angular web based systems with tens of thousands of users from scratch.

PROFESSIONAL EXPERIENCE

Senior Full Stack Developer – Sedgwick International

2021 – Present | Remote B2B

• **Project:** Working on two web projects: a mobile focused B2C web platform and a desktop focused B2B web platform for a large company in the insurance domain

• **Role**: Focused on the backend development while in the same time providing frontend support when needed. Designed and developed scalable backend services with full testing coverage. Built REST APIs and data services following clean architecture add DDD principles for supporting high volume enterprise workflows and distributed systems. Migrated legacy systems into microservices architecture with containerization and improved observability. Integrated AI tools in the development process such as Copilot, Cursor, custom AI agents, custom skills, etc...

- **Technology Stack**: .NET 10, ASP NET Core, .NET Aspire, Blazor, Minimal APIs, SignalR Web Sockets, xUnit, Redis, TypeScript, Angular 20, Docker, Azure App Services, Azure Application Insights.
- **AI tooling**: Copilot, Cursor, MCPs, custom prompt templates, custom AI agents built on top of the latest LLMs by Anthropic & OpenAI aimed of supporting the development process for example with automated PR reviews or with creating detailed Azure DevOps tasks based on requirements.

Senior Full Stack Developer / Team Lead – Kids Art Works

2018 – 2021 | Remote B2B

- **Project**: Kids Art Works a web based platform for rising funds for schools by selling merchandise with child art printed on them

- **Role**: Joined as a Senior Developer but in with a year promoted to Team Lead and worked on the API architecture, frontend layer and on critical system integrations. Designed critical system integrations: payment (Windcave and Paypal), accounting (Xero), shipment and delivery (eShip/nzPost). Developed a custom company emailing engine based on Hangfire for asynchronous mail processing tasks.
- **Technology Stack:** .NET 4.6, ASP.NET Web API, ASP.NET MVC, MSSQL, Hangfire

Senior Software Engineer – Receipt Bank

2017 – 2018 | Remote

- **Project**: Receipt Bank a web based system and mobile app for scanning receipt data and integrating it into third party accounting systems
- **Role**: Worked on the company' s Data Lake. Developed data processing pipelines that collect the data from various sources directly into Redshift to be integrated with Looker BI tool.Optimised data infrastructure for high throughput processing and system reliability.
- **Technology stack**: Python, Spark, and AWS EMR, AWS Kinesis Streams, AWS Redshift, RabbitMq

Team Lead – Scalefocus

2014 – 2017 | Sofia, Bulgaria

- **Project**: Versant Voyager a complex e-learning system for post graduate education of the nursing staff in large American hospitals fully hosted on AWS. Used by tens of thousands of medical employees.
- **Role**: Led development of the fully cloud hosted web platform from proof of concept to a fully working web system serving over 50k users in the USA. Supported the project manager and product owners in transforming the business requirements into well defined Jira tasks and distributing them among team members.
- **Technology stack**: AngularJS, ReactJS, Javascript, NET 4.5 Web Api, Redis, MSSQL, AWS cloud services such as EC2, RDS, DynamoDB, Redshift, SQS, API Gateway, ElasiCache, VPC, S3.
- **Project**: Versant Mobile apps: two mobile apps for iPad that interact with an old .NET 2 applications using ASP.NET Web API HTTP services.
- **Role**: Designed and developed two hybrid mobile apps end to end by integrating an old .NET 2 project domain layer and exposing the data through HTTP endpoints using ASP.NET Web API. Implemented CQRS pattern for efficient database utilization
- **Technology stack**: .NET 4.5, ASP.NET Web API, Apache Cordova, jQuery, HTML,

Full Stack Developer – Bulpros

2012 – 2014 | Sofia, Bulgaria

- **Project**: Perfect Costing Solutions: desktop software for cost optimizations in the German automotive industry using

- **Role:** Supporting the Team Lead on critical tasks and bugs, writing unit tests
- **Technology stack**: C#, NET 4, Windows Forms and MSSQL

Junior Full Stack Developer – Amexis

2011 – 2012 | Sofia, Bulgaria

- **Project**: Pay Waste Tax – a website for recording and collecting waste tax by the citizens of a small municipality in Bulgaria. Implemented a demo Windows Phone mobile application on top of the application (data access) layer of the main web system exposing the data through Web Api 2.0 http services and consuming them in a XAML based Windows Phone native mobile application..
- **Role**: Full ownership of the tasks, supporting the project manager to transform the business requirements into well documented tasks. Extensive work on all project levels – database, backend, frontend. Designed and developed the Windows Phone 8 demo mobile application from scratch using the domain layer of the larger web platform exposed via HTTP using Asp.NET Web API endpoints.
- **Technology stack**: ASP.NET Web Forms,ASP.NET Web Api, XAML, MSSQL, jQuery, CSS, HTML

- **Project**: Pelican Hotel Booking – a small mobile focused hotel booking website for a company from South East Asia
- **Role**: Started as Junior developer but in a few months took full ownership of the project alongside the project manager after the senior developers were transferred to more critical company projects.
- **Technology stack**: .NET 3.5, ASP.NET Web Forms, MSSQL, jQuery, CSS, HTML

EDUCATION

Bachelor of Informatics – Sofia University (2009 – 2013)

CERTIFICATIONS & COURSES

- Microsoft Certified Professional Developer: Web Applications
- DataCamp: Associate AI Engineer
- AI Engineer Agentic Track: The Complete Agent & MCP Course - Udemy
- Frontend Developer – AlgoExpert
- Algorithms & Data Structures – AlgoExpert
- Upwork Top Rated Developer
