

ANTON KOVACHEV

Senior Software Engineer | Full Stack

Location: Bulgaria | Email: anton.kovachev9@gmail.com | GitHub: github.com/anton-kovachev |

StackOverflow: stackoverflow.com/users/9122354/anton-kovachev

PROFILE

Senior Software Engineer with 10+ years of experience building scalable backend systems, public APIs, and cloud-native applications using C#, .NET, JavaScript, and TypeScript. Strong background in REST, GraphQL, and WebSocket API design, distributed systems, and microservice architectures. Recently focused on pivoting into the Web3 and blockchain engineering space. I bring strong foundations in Solidity smart contracts development and working with EVM tooling such as Foundry via Cyfrin Updraft and AlgoExpert. Recently earned the [Cyfrin Solidity Smart Contract Developer Certificate](#).

Solidity Smart Contract Developer Certificate – Cyfrin

2026 March

Earned [Cyfrin's s SSCD+ certificate](#) one of the premier certifications for Solidity developers, recognized by industry-leading protocols. Attended [CodeHaws Smart Contract Security Audit contests](#)

PROFESSIONAL EXPERIENCE

Senior Full Stack Developer – Sedgwick International

2021 – Present | Remote

- **Project:** Working on two web projects: a mobile focused b2c platform and a desktop focused b2b platform for a large company in the insurance domain
- **Role:** Led the backend development while also providing frontend support. Designed and developed scalable backend services with full testing coverage. Built REST APIs and data services supporting high volume enterprise workflows and distributed systems. Migrated legacy systems into microservices architecture with containerization and improved observability. Integrated AI tools in the development process such as Copilot and Cursor
- **Technology Stack:** .NET 10, ASP NET Core, Web Sockets, xUnit, Redis, TypeScript, Angular 20, Docker, Azure App Services, Azure Application Insights. AI tooling: Copilot, Cursor, MCPs

Senior Full Stack Developer / Team Lead – Kids Art Works

2018 – 2021 | Remote

- **Project:** Kids Art Works a web based platform for raising funds for schools by selling merchandise with child art printed on them
- **Role:** Joined as a Senior Developer but in six months promoted to Team Lead and worked on the API architecture, frontend and system integrations. Designed critical system integrations: payment (Windcave and Paypal), accounting (Xero), shipment and delivery (eShip/nzPost). Developed a complex company emailing engine based on Hangfire for asynchronous mail sending.
- **Technology Stack:** .NET 4.6, ASP.NET Web Api, ASP.NET MVC, MSSQL, Hangfire

Senior Software Engineer – Receipt Bank

2017 – 2018 | Remote

- **Project:** Receipt Bank a web based system and mobile app for scanning receipt data and integrating it into third party accounting systems
- **Role:** Worked on the company's Data Lake. Developed large scale data processing pipelines that collect the data from various sources directly into Redshift to be integrated with Looker BI tool. Optimized data infrastructure for high throughput processing and system reliability.
- **Technology stack:** Python, Spark, and AWS EMR, AWS Kinesis Streams, AWS Redshift

Team Lead – Scalefocus

2014 – 2017 | Sofia, Bulgaria

- **Project:** Versant Voyager a complex e-learning system for post graduate education of the nursing staff in large American hospitals fully hosted on AWS. Used by tens of thousands of medical employees.
- **Role:** Led development of the fully cloud host web platform from proof of concept to a finished web system. Supported the project manager and product owners in transforming the business requirements

into well defined Jira tasks and distributing them among team members.

- **Technology stack:** AngularJS, ReactJS, Javascript, NET 4.5 Web Api, Redis, MSSQL, AWS cloud services such as EC2, RDS, DynamoDB, Redshift, SQS, API Gateway, ElastiCache, VPC, S3.

Full Stack Developer – Bulpros

2012 – 2014 | Sofia, Bulgaria

- **Project:** Perfect Costing Solutions: desktop software for cost optimizations in the german automotive industry using
- **Role:** Supporting the Team Lead on critical tasks and bugs, writing unit tests
- **Technology stack:** NET Windows Forms and MSSQL

Junior Full Stack Developer – Amexis

2011 – 2012 | Sofia, Bulgaria

- **Project:** Pay Waste Tax – a website for recording and collecting waste tax by the citizens of a small municipality
 - **Role:** Full ownership of the tasks, supporting the project manager to transform the business requirements into well documented tasks. Extensive work on all project levels – database, backend, frontend
 - **Technology stack:** ASP.NET Web Forms, MSSQL, jQuery, CSS, HTML
-
- **Project:** Pelican Hotel Booking – a small mobile focused hotel booking website for a company from South East Asia
 - **Role:** Started as Junior developer but in a few months took full ownership of the project alongside the project manager after the senior developers were transferred to more critical company projects.
 - **Technology stack:** ASP.NET Web Forms, MSSQL, jQuery, CSS, HTML

EDUCATION

Bachelor of Informatics – Sofia University (2009 – 2013)

CERTIFICATIONS

- **Cyfrin Smart Contract Developer**
- **Blockchain Developer – AlgoExpert**
- **Frontend Developer – AlgoExpert**
- **Algorithms & Data Structures – AlgoExpert**
- **Microsoft Certified Professional Developer: Web Applications**
- **Upwork Top Rated Developer**
